

2019-20 11013 - Nonlinear Photonics Group 1

Subject

Subject / Group Degree Credits	11013 - Nonlinear Photonics / 1 Master's in Physics of Complex Systems 6
Period	2nd semester
Language of instruction	English

Professors

Lecturers	Office hours for students					
	Starting time	Finishing time	Day	Start date	End date	Office / Building
Ingo Fischer -	15:00	16:00	Thursday	20/02/2020	28/05/2020	217
Responsible						
fischer.bert@uib.es						
Miguel Cornelles Soriano	12:00	13:00	Friday	07/02/2020	29/05/2020	106

Context

Lecturer: Ingo Fischer (PhD in Physics 1995 from University of Marburg, Germany) is member of the IFISC (UIB-CSIC) and the head of the University Group on Experimental Physics of Complex Systems (FESC). He has a long-standing teaching experience in several European countries. He has 4 quinquenios and 4sexenios.

Context of the Course: The aim of this subject is to train potential researchers in the study of nonlinear photonic systems and the complex behavior they exhibit. This comprises lasers as photonic devices, in particular semiconductor lasers, the physics of their nonlinearities, applications of these lasers, their dynamical properties, and their characteristic instabilities. The course is taught using the methodologies of photonics, optics, semiconductor physics and dynamical systems, including laboratory courses. The lab courses will be supervised by Dr. Miguel Cornelles Soriano.

Requirements

Recommended

It is highly recommended that the students have taken courses on optics, optolelectronics and / or solid state physics during their undergraduate studies.

Skills

1 / 4

Date of publication: 25/06/2019

2019-20 11013 - Nonlinear Photonics Group 1

Specific

- * E1: Ability to perform laboratory experiments based on theoretical knowledge and adequately describe the results.
- * E8: To know to characterize generic behavior of dynamical systems and their instabilities.
- * E9: To know stability analysis techniques and know how to build bifurcation diagrams.

Generic

- * TG1: To be able to describe, both mathematically and physically, complex systems in different situations
- * TG2: To acquire the capacity to develop a complete research plan covering from the bibliographic research and strategy to the conclusions.
- * TG3: To write and describe rigorously the research process and present the conclusions to an expert audience.

Basic

* You may consult the basic competencies students will have to achieve by the end of the Master's degree at the following address: <u>http://estudis.uib.cat/master/comp_basiques/</u>

Content

Range of topics

- 1. Motivation of complex behavior in photonic systems
 - * Relevance and manifestations of complex behavior in nonlinear photonic systems
- 2. Introduction Lasers
 - * Absorption.
 - * Spontaneous emission.
 - * Stimulated emission.
 - * Population inversion
- 3. Laser types
 - * Gas lasers. solid state lasers, etc
- 4. Laser rate equations
 - * Isomorophy Lorenz equations Maxwell Bloch equations
 - * Classification of lasers. Types A, B, C
- 5. Semiconductor lasers.
 - * Linewidth.
 - * Relaxation oscillations.
 - * Nonlinearities
- 6. Important photonic components
 - * Detectors.
 - * Modulators.
 - * Optical amplifiers.
 - * Optical fibers
- 7. Application of semiconductor lasers
 - * Optical communication. Further applications
- 8. Complexity in laser systems
 - * Lasers with added degrees of freedom (Injection, Modulation, Feedback).
 - * Multimode lasers.

Academic year Subject Group

2019-20 11013 - Nonlinear Photonics Group 1

- * Coupled lasers.
- * Spatio-temporal instabilities.
- * Applications of complex laser dynamics.

Teaching methodology

In-class work activities (1.5 credits, 37.5 hours)

Modality	Name	Typ. Grp.	Description	Hours
Theory classes	Lectures	Large group (G)	Explanation of concepts by the professor and in interaction with the students.	26
Laboratory classes	Laboratory project	Small group (P)	Measurement of	11
			 * LI Characteristics * relaxation oscillations * laser parameter determination * feedback instabilities 	
Assessment	Oral presentation	Large group (G)	Oral presentation to the whole class of an assigned problem	0.5

At the beginning of the semester a schedule of the subject will be made available to students through the UIBdigital platform. The schedule shall at least include the dates when the continuing assessment tests will be conducted and the hand-in dates for the assignments. In addition, the lecturer shall inform students as to whether the subject work plan will be carried out through the schedule or through another way included in the Aula Digital platform.

Distance education tasks (4.5 credits, 112.5 hours)

Modality	Name	Description	Hours
Individual self- study	Understanding of concept	s Understanding and mastering the concepts explained in the lectures	30
Individual self- study	Preparation of lab project and lab report	Preparing for and understanding the requirements for the lab project and describing the lab work following scientific standards.	42.5
Individual self- study	Preparation of oral presentation	Preparation of oral presentation	40

Specific risks and protective measures

For the lab courses a laser safety instruction and necessary means will be provided.

Student learning assessment

Frau en elements d'avaluació

In accordance with article 33 of Regulation of academic studies, "regardless of the disciplinary procedure that may be followed against the offending student, the demonstrably fraudulent performance of any of the evaluation elements included in the teaching guides of the subjects will lead, at the discretion of the teacher, a undervaluation in the qualification that may involve the qualification of "suspense 0" in the annual evaluation of the subject".

Laboratory project

Modality	Laboratory classes
Technique	Student internship dissertation (non-retrievable)
Description	Measurement of *LI Characteristics*relaxation oscillations*laser parameter determination*feedback instabilities
Assessment criteria	Accuracy and quality of the lab work and of its presentation
Final grade percentage:	50%

Oral presentation

Modality	Assessment
Technique	Oral tests (non-retrievable)
Description	Oral presentation to the whole class of an assigned problem
Assessment criteria	Accuracy and quality of the presented work as well as the clarity in the oral presentation

Final grade percentage: 50%

Resources, bibliography and additional documentation

Basic bibliography
